Subject: International Life Saving Federation letter of confirmation for the Red Cross of Serbia

The International Life Saving Federation (ILS) confirms that the Red Cross of Serbia (RCS) as national lifesaving organization in Serbia, is a full member with accredited courses that are listed on the ILS equivalency tables.

According to ILS rules we confirm that certificates for accredited training programs for lifesaving ranks represent licenses as well, but these documents do not guarantee employment.

As a full member with accredited courses the Red Cross of Serbia can implement following activities:

- Organize and implement training courses for lifesaving ranks according to ILS accredited courses.
- Issue certificates, identification cards and licenses with both ILS and RCS logo to individuals that have met all predicted requirements.

This letter confirms that all certificates, identification cards and licenses with both ILS and RCS logo for mentioned lifesaving ranks are internationally recognized according to standards recommended by ILS.

ILS certificates and licenses do not represent documents that guarantee employment, but they do confirm that the holder of the certificate has successfully completed a course of training which meets minimum internationally recognized competencies developed by ILS.

For ILS,

Yours sincerely,

Graham Ford
President

Dr Harald Vervaecke PhD
Secretary General
