

**PUBLIC PROCUREMENT F1/21**  
Questions and answers

date: 3.2.2021.

**Question:** The tender specification (on page 7) requests delivery on DDP incoterms. We have checked with multiple freight companies, however unfortunately none of them can deliver on DDP terms.

Would it be acceptable, as an alternative, to make our offer on DAP incoterms?

**Answer:** The only acceptable way of delivering goods for Red cross of Serbia is delivery to a final destination - warehouse located in Mladenovac, Serbia.

The delivery to a final destination has to be the supplier's obligation. Hiring a subcontractor, carrier or freight forwarder is the obligation of the supplier. Supplier should calculate all these costs in its total price. The Red Cross of Serbia should be exclusively the buyer of the goods and should not be obliged to bear any costs or carry out any customs procedures, which should be the obligation of the supplier. The goods have to be delivered as if they were a national delivery.

Also, the total offered price must include all costs so that the Red cross of Serbia as a buyer does not have any additional costs after delivery.

The price should include all customs duties, taxes and fees and transport costs to the warehouse, and the supplier is obliged to perform all administrative procedures related to the import of goods into the country and transport to the final destination.

The Red cross of Serbia will pay an invoice with price that include all these costs (it is not necessary to show them separately in the invoice).

This is the only acceptable method of delivery, so DAP Incoterms will not be acceptable because it does not include all the necessary import formalities and fees.

Lot number 2

**Question:** Tent connection system: we produce a 4ways connection, that means a cross tunnel to connect 4 tents. Do you need a 4ways connection unit for each tent?

**Answer:** There is no need for 4 ways connections.

**Question:** The requested tent color is white. Which colour shall be the groundsheet and mud flaps?

**Answer:** Groundsheet and mud flaps should be grey.

**Question:** For this tent there is no request of flame retardant fabric, isn't it?

**Answer:** For this tent there is no request of flame retardant fabric.

Lot number 3

**Question:** This tent shall be white and fire retardant. Pls indicate color of ground sheet

**Answer:** Groundsheet should be grey.

**Question:** Shall the tent be welded or sewn?

**Answer:** This type of that should be stitched, with waterproof thread and a special seal to ensure that they are waterproof.

**Question:** Wind resistance up to 100km/h. A tent of requested dimensions and characteristics will hardly stand up against such a strong wind...In which countries will be used the concerned tents?

**Answer:** Wind resistance should be up to 100 km/h. Tents will be used in Serbia and Western Balkans area.
